CIBA INDUSTRIES

WHERE PROCESS MEETS INTELLIGENCE FOR

SMARTER AUTOMATION

OUR ETHOS

We believe Africa remains one of the most under-automated regions in the world, yet the opportunity for transformation is immense.

Too often, organisations believe that the advanced systems powering the world's leading companies are only accessible to large global enterprises.

Our purpose is to change that. CIBA exists to give African organisations access to world-class automation, intelligent systems, and operational insight, enabling them to participate fully in the digital revolution and compete confidently on the global stage.

Financial Intelligence

Workforce Solutions

About us

CIBA Industries was established in 2014 and is a certified Level 1 B-BBEE technology and consulting firm based in Johannesburg and France .

Mission?

To deliver integrated AI process intelligence and workforce solutions that enable organisations worldwide to navigate complex change, unlock value, and achieve sustainable growth.

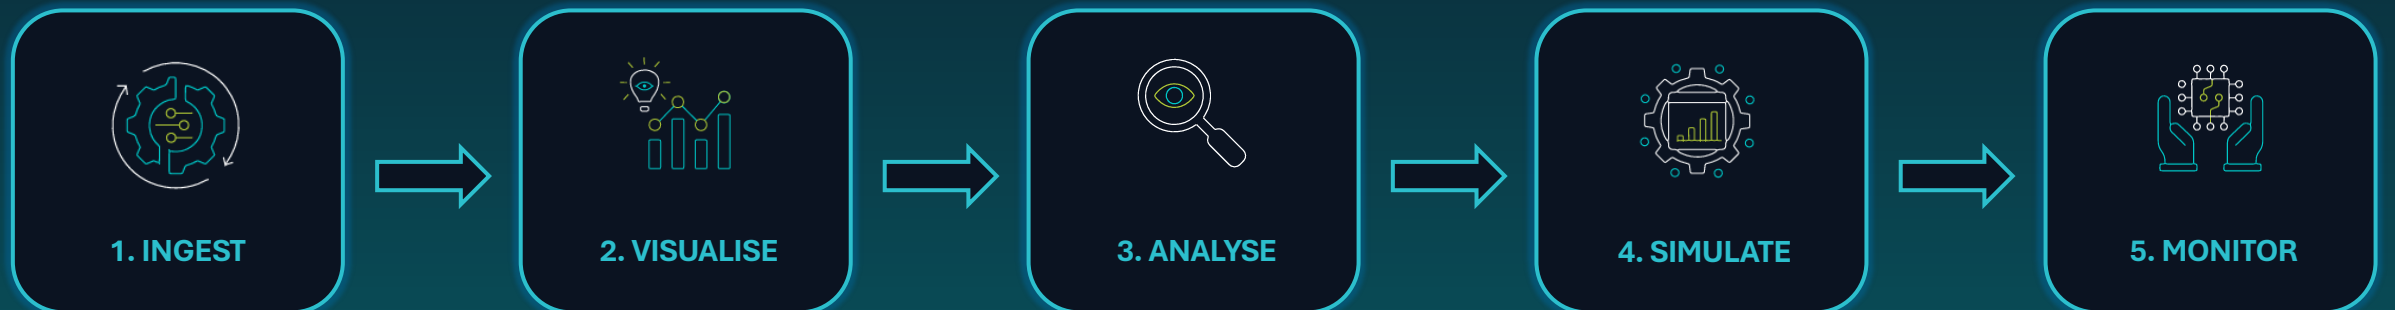

PROCESS INTELLIGENCE

SEE THE FUTURE

Companies need process insight to gain end-to-end, data-driven visibility into how work actually flows, so bottlenecks, compliance risks, and automation opportunities are identified with precision. This unlocks faster decisions, lower costs, better customer experiences, and continuous improvement tied to measurable outcomes.

Comprehensive process mining capabilities (as-is), integrated with modeling (to-be), simulation (what-if) and monitoring environment.

FINANCIAL INTELLIGENCE

ONE BUDGET, ONE PLAN, ONE SET OF NUMBERS

“CCH® Tagetik delivers predictive budgeting, planning and forecasting across financial and operational areas. Powered by the Analytic Information Hub, it unifies high-level financials with detailed operational data, supports unlimited dimensions and complex calculations, and ensures governance through strong data management, process orchestration and audit capabilities.” – Gartner

INSTANT PREDICTIVE PLANS

Predict *'what'* your future holds.

INSIGHTS EXPLAINED

Understand the *'why'* behind predictions.

ACCURATE, BETTER DECISIONS

Understand *'how'* to improve outcomes.

AUTOMATION PORTFOLIO

Leading companies are using AI and robotics to streamline workflows, cut repetitive tasks, boost efficiency, and helping organisations achieve accuracy, speed, and scalability so their people can focus on innovation and growth.

INDUSTRY BUZZ WORDS

Process Intelligence ● Financial Intelligence ● Intelligent Automation ● Workforce Intelligence

Africa's Premier Partner

Named a Leader in Gartner's Magic Quadrant for Process Mining and a solution backed by Salesforce, Apromore's Insight Engine provides enterprises with accurate, stable strategy-led simulations and predictions.

Armed with embedded AI and state-of-the-art governance, the award-winning CCH® Tagetik expert solution enables CFOs and their peers, in global enterprises, to make faster and better-informed decisions.

INTELLIGENT AUTOMATION

REVOLUTIONISING BUSINESS OPERATIONS WITH INTELLIGENT AUTOMATION.

CIBA enables organisations to streamline operations, enhance efficiency, and drive growth. We specialise in **Robotic Process Automation (RPA)** and seamlessly integrate advanced automation technologies, including **Automation Anywhere, Microsoft, UiPath, MuleSoft**, and open-source tools, to deliver fast, scalable, and secure automation solutions.

Robotic Process Automation (RPA)

Automate repetitive tasks with precision and intelligence

Business Process Management (BPM)

Optimise and manage your processes for enhanced agility and efficiency

System Integration

Seamlessly unify your systems and applications for a cohesive operational experience

Custom Intelligent Automation Services

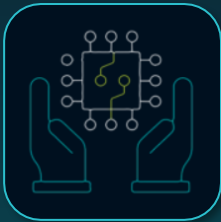

Develop bespoke strategies to tackle your specific business challenges and goals

WORKFORCE INTELLIGENCE

EQUIPPING BUSINESS WITH THE RIGHT PROFESSIONALS, FROM BUSINESS ANALYSTS TO DEVELOPERS, ARCHITECTS AND GRADUATES.
